

March 2024

Market Trend Summary

Despite March sales remaining consistent with last year, after the first quarter sales remain lower than levels reported last year. Some of the challenge in the market has been related to new listings and supply levels. New listings continue to fall keeping inventory levels at some of the lowest levels ever reported in March. With 173 units in inventory and 104 sales, the months of supply fell below two months in March.

Persistently tight market conditions continue to weigh on home prices. Year-to-date the average price in Medicine Hat rose by nearly 11 percent for a total of \$329,170. Prices rose across most property types with the largest gains occurring in the detached sector of the market.
